EDUCATION

Alliance University, Bangalore

Bachelor of Technology (B.Tech) in Computer Science & Engineering | 2024 – 2028

- Specialization (Minor): Cloud Computing

TECHNICAL SKILLS

Programming Languages: C (primary), C++ (basic OOP), Python (basic), Java (basic)

Core Concepts: Data Structures (Arrays and Strings), Dynamic Memory Allocation(C), File Handling (C), Basic Problem Solving

Object-Oriented Concepts: Classes, Objects, Inheritance, Polymorphism (C++)

Databases: SQL (basic)

Cloud & Platforms: Microsoft Azure (Virtual Machines, Azure SQL, Resource Groups)

Tools: Git (basic), Linux / WSL (basic)

PROJECTS

Scalable Student Information System (C, SQL)

- Developed a menu-driven application in C to manage student records with persistent storage.
- Used SQLite as an embedded database to perform CRUD operations using SQL queries.
- Executed and tested the application in a Linux (WSL) environment using GCC.
- Designed clear separation between application logic and data storage, with scope for future cloud deployment.

Parking Management System (C)

- Built a menu-driven parking system using C.
- Used structures and arrays to store vehicle details.
- Applied modular programming and basic memory handling.

Student Record Management System (Python)

- Created a console-based program to manage student records.
- Used lists and dictionaries for storing data.
- Applied function-based design and basic problem-solving logic.

TECHNICAL EXPOSURE

- Hands-on experience working in Linux (WSL) environment for compiling and running C programs.
- Experience using SQL-based data storage in small-scale applications.
- Familiar with command-line tools and basic debugging workflow.
